Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the second Office Action corresponding to invention election filed Oct 22, 2004. The application contains 20 claims.

Election/Restrictions

Claims 19 and 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on Oct 22, 2004.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on Mar 18, 2004 has being considered by the examiner.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 53 (page 9, line 31), and 38 (page 10, line 13). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page

Art Unit: 3632

header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: on page 16, lines 5 and 7, "262" apparently should be - - 262 - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-13, and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudolph (Pat No 2,809,002) in view of Kassouni (Pat No 5,407,310).

Art Unit: 3632

The patent to Kassouni discloses a hanger assembly comprising two slidable connected sections (26, 27) each having a flange (32, 38) with holes for receiving fasteners for securing the hanger between two structural members.

The patent to Kassouni discloses a device comprising threaded members (16, 18) presecured to the device.

It would have been obvious to one skilled in the art at the time the invention was made to have provided the hanger assembly shown by Rudolph with presecured fastener to facilitate securing the hanger to the structural members by avoiding to look for a fastener and hold it while driving the fastening; it also avoid loosening fasteners while securing the hanger. As to the use of a pilot hole, this practice is well known in the art to facilitate driving a fastener.

Allowable Subject Matter

Claims 4 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gretz (6,768,071) and Dinh et al. (2003/0006353 A1) show hanger assemblies of interest.
